

PROJECT TITLE

“Native herbaceous plant mixtures for low water need and maintenance cover”

CLIENT

- Nurseries
- Seed producers

OBJECTIVES / ENTREPRENEURIAL OPPORTUNITIES

Production of two ground cover mixtures of low herbaceous plant species native of Greece with minimal water needs and maintenance, to be used in private gardens, urban parks, archaeological sites, roadsides, e.t.c. The one mixture will be suitable for hot and dry Mediterranean climate and the other for cool and wet Mediterranean climate.

RESULTS

- Records of suitable native plant species have been completed
- Three plant mixtures for hot/dry areas and three for cool/wet areas have been tested
- A plant mixture has been tested in various climatic conditions of Greece
